“The smallest graphical TDR in the world”

FEATURES

- ◆ The Pro400™ is a professional Time Domain Reflectometer and Toner designed to detect and locate faults on copper cables up to a distance of 6500ft (2000m).
- ◆ Advanced signal processing techniques enable the Pro400™ to find opens, short circuits, splices, taps, water ingress and other more elusive faults. A built in tone generator also provides a tone for wire tracing and identification.
- ◆ Selectable cable impedance matching, along with variable velocity factor, enable the Pro400™ to be used to test all communication and control cables, with graphical results and fault distances displayed on a dot matrix LCD.
- ◆ The TDR/Fault Finder is housed in a tough, ruggedized ABS plastic case, water and dust proof to IP54, and supplied complete with test leads and a protective tool-belt holster.
- ◆ The Pro400™ is designed and manufactured to international standards for quality, safety and reliability.
